

COLOUR COLLAGE

Supplies:

- Coloured paper
- An array of similarly coloured scrap paper/craft supplies
- Craft Glue

1. Set out 2 or 3 different colours of paper. Write the name of the colour on top.
2. Tear up some scrap paper in each of the same colour or locate some craft supplies with the same colour.
3. Allow your child to find the paper and craft supplies with the corresponding colours to create a collage

Tips:

The scraps of paper you choose to use does not have to be exactly the same colour, various shades of the same colour work too. To make this activity more challenging you can touch on the idea of mixing colours. A great way to touch on this idea can be using secondary colours as your chosen coloured paper (green, purple and orange) and rather glue primary colours that blend together to make that colour.
