

# MAGIC MILK EXPERIMENT

## Supplies:

- Shallow Dish
- Full Cream Milk
- Food Colouring
- Q Tip
- Liquid Soap

## Instructions:

1. Generously cover the bottom of the shallow dish with milk.
2. Drop several drops of different coloured food colouring into the dish of milk.
3. Dip the Q Tip into soap first before sticking it in the milk to see what happens.

## Tips:

The Thicker the consistency the better, skim milk won't work as well as Full Cream.

Try using only two primary colours of food colouring to see what colour it begins to make when swirled together.

No Q Tip? Use anything with a small end such as a pipe cleaner or a pencil, otherwise you can just drop a single drop of soap from the bottle.
