

BOTTLE BOWLING

Supplies:

- Plastic Bottles (6-10)
- Ball

1. Line up plastic bottles in a triangular shape. Six to ten bottles work well.
2. Roll ball at the bottles to try knock them all down.
3. Set them up again and bowl.

Tips:

- Tape numbers or letters on the bottle to get involved in some creative learning. For example, 'knock over number 1'.
- Younger kids may do better with less bottles. Try three if they aren't knocking over.
- Try other ways of setting up the bottles. Can you knock them all down if they're lined up in a row?
